Q-A and B start from house at 10am. They travel from their house on the MG road at 20kmph and 40 kmph. there is a Junction T on their path. A turns left at T junction at 12.00 noon, B reaches T earlier and turns right. Both of them continue to travel till 2pm. What is the distance between A and B at 2 pm.

Sol: Distance between House and T junction = 20 x 2 = 40. i.e. B reached T at 11 am.

B continued to right after 11 am and travelled upto 2. So distance covered by him = 3 x 40 = 120
A reached T at 12 noon and travelled upto 2 So distance travelled by him = 2 x 20 = 40
So total distance between them = 120 + 40 = 160 km
